# HOW TO USE THIS BOOK

## The prices we quote and the abbreviations we use

This guide offers independent price information about all Great Britain stamps issued from 1840 to date, based on the selling prices of most dealers. The publisher of *British Stamp Market Values* is not affiliated to any dealer.

### ABBREVIATIONS

The following abbreviations are used:

Des: designer

Perf: perforation

Wmk: watermark

### GENERAL NOTES

■ Used prices quoted are for fine examples with full perforations or reasonable margins as applicable, and with either a light duplex cancellation (pre-1880) or a clear steel datestamp (post-1880).

■ Unused prices assume stamps are se-tenant where applicable.

■ As modern GB special issues are usually sold only in sets, prices of individual stamps might not be quoted.

# STAMP PRINTERS

## A quick guide to who printed what, and when

A relatively small number of security printers has dominated the production of British stamps since 1840. Here are their details.

### PERKINS BACON 1840–1879

American inventor Jacob Perkins developed intaglio printing, and his son-in-law Joshua Bacon joined him in business in London.

**First issue:** 1840 1d black

**Last issue:** 1870–79 1½d rose–red

### SOMERSET HOUSE 1847–1926

The Stamp Office at Somerset House in London had been printing revenue stamps since 1694, and was familiar with embossing technique required for the first high-value postage stamps.

**First issue:** 1847–54 1/- green

**Last issue:** 1924–26 definitive series

### DE LA RUE 1855 to date

Guernseyman Thomas De La Rue came to prominence by offering surface-printing, which was ideal for stamps requiring perforation.

**First issue:** 1855–57 4d carmine

### HARRISON & SONS 1911–1998

After initially printing by typography, this firm became synonymous with the photogravure technique from 1934 and remained the dominant printer of British stamps for many years. It was taken over by De La Rue in 1997.

**First issue:** 1911–13 definitive series

**Last issue:** 1998 The Queen's Beasts set

### WATERLOW & SONS 1913–1955

There were two different Waterlow firms until 1920, after a family feud. The business was taken over by De La Rue in 1960.

**First issue:** 1913 'Seahorses' high-value series

**Last issue:** 1955 'Castles' high-value series

### BRADBURY WILKINSON 1918–1973

A producer of colonial stamps since 1875, this company was owned by the American Banknote Company from 1903 and was acquired by De La Rue in 1986.

**First issue:** 1918–19 'Seahorses' high-value series

**Last issue:** 1973 Parliamentary Conference set

### ENSCHEDÉ 1979 to date

The Dutch company founded in 1703 became a back-up for Harrisons because of its capability of printing by photogravure.

**First issue:** 1979 8p red definitive

### WADDINGTONS 1980–1981

This firm produced stamps under its own name only briefly, before acquiring House of Questa.

**First issue:** 1980 4p greenish-blue definitive

**Last issue:** 1981 4p and 20p definitives

### HOUSE OF QUESTA 1980–2003

Initially independent, the company was owned by Waddingtons from 1984, MDC from 1996 and De La Rue from 2002.

**First issue:** 1980 75p grey definitive

**Last issue:** 2003 Extreme Endeavours set

### WALSALL/ISP 1989 to date

The company initially promoted itself as an expert in self-adhesive printing, but has also printed gummed issues by litho and gravure. It was fully rebranded as International Security Printers in 2014.

**First issue:** 1989 14p and 19p definitives (booklet)

### CARTOR/ISP 2005 to date

The French company known for litho production and special printing techniques has been owned by Walsall (now ISP) since 2004.

**First issue:** 2004 customised Smilers sheets

# *To think Dealers* told us it wouldn't work

*Hi,*

That's me Promoting  
Philately with Alan Titchmarsh  
on UK National TV

It all started with the two-legged stool; I remember the conversation why we wanted to start a Stamp Auction like NO other...

**It was 1999. We had a good stamp business. I'd started by supplying stamps on approval. In fact, just like Victor Kiam of Remington Razors fame, I bought the stamp 'Approvals' Company called Omniphil that sent me stamps on approval when I was in my teens, but that's another story...**

After a few years I decided that a 'one-legged' stamp approvals business, should stand on two feet(!), so I added a 'Buy One, Take One Free' off-paper world mixtures department which soon became a big success thanks to a loyal following of collectors who loved sorting through unsorted mixtures, and still do.

Meanwhile buying stamp collections at auction had created a pleasant problem. We had accumulated better stamps which we felt were too valuable to be sent to clients on approval through the mail. Determining how best to handle these my wife and I came to the conclusion that just like a stool, a good stamp business should not stand on two feet alone... so we decided to add a third leg to our stamp business ...

... **Yes**, a stamp auction, which (you may have already guessed) had to be unlike any other by including the best features of other auctions, whilst

eliminating the worst features such as 'caveat emptor' (buyer beware) and buyer's premiums which instinctively, we reasoned not to be in the best interests of collectors. We wrote to existing stamp auctions for their latest catalogues which we thoroughly analysed. And soon, we named our new stamp auction - Universal Philatelic Auctions and christened it UPA.

## *But Could We Solve the Stamp Trade's BIGGEST Problem...?*

It was common knowledge in the trade that the trade's biggest problem was not what sold – but what didn't sell. That's the reason why you see the same overpriced stamps year in, year out with some dealers and auctions. Nowadays dealers and auctions are more sophisticated – for example they may sell on eBay as well as conventionally – but twenty years ago auctions would parcel up their unsold auction lots and sell them/swop them with

other auctions, in order to 're-fresh' each other's stock, thereby offering 'NEW' stock to (hopefully) new collector clients. Other auctions would go to

# ***Making*** My New Auction Work

**'We canvassed trade opinion – Dealers told us it wouldn't work!'**

the lengths of re-describing their old unsold auction lots in order to disguise them. Just imagine, for a moment ... the Importance of Selling Your Unsold Lots – unless you are unscrupulous, your unsold lots represent your profit tied up in stale stock, not cash!

***The 'break-through' took a fair bit of 'head-scratching' – but would it *work*...?***

Twenty years later the answer seems simple, but it didn't feel simple then. The future health of our new UPA 'baby' depended upon getting it right. We had to break through moribund stamp industry practices which were obviously sticking a plaster on the 'unsolds' wound, whilst not facing up to the fact that if it wasn't selling it simply wasn't worth the price being asked...

...and therein lies the 'clue'. As soon as we thought of the solution, it seemed so simple that we questioned would it work? Why had no other auction – even to this very day not thought of, or deployed a **structured Reducing Estimate (and Reserve) Price System** each time an unsold lot was re-offered, and instead of trying to hide what wouldn't sell – we'd make a virtue out of a reduced price lot

and tell collectors that (sin of sins) the lot hadn't previously sold (which we call **US** for unsold once, **US2** for unsold twice etc).

We canvassed trade opinion – dealers told us it wouldn't work... BUT, sometimes, just some times ...when you're told something won't work that's the time to do it, isn't it?

**650** different bidders in our 1st UPA auction almost 20 years ago

**2,002** different bidders in my latest 73rd UPA auction, from 47 different Countries

And did it work? In our first auction in year 2000 we had 650 different bidders. You're going to find this hard to believe – but today, almost 20 years later – hardly another stamp auction has 650 different bidders, let alone 2,002, and why is that? Because no other international philatelic auction is prepared to offer you:

## QUEEN VICTORIA

For this reign prices are given for lightly mounted unused (left) and fine used (right). The exception is for the 1840–1841 issues, where fine used prices are subdivided into stamps with four margins (centre) and three margins (right). Take care when buying unmounted mint because there are known cases of regumming.

## KING EDWARD VII

For this reign, most stamps are priced in three columns: unmounted mint (left), mounted mint (centre) and fine used (right). However, booklet panes are priced for mounted mint only.

De La Rue printings are generally cleaner, with good centring and neat perforations. Harrison and Somerset House printings are coarser, with poor centring and ragged perfs.

A vast range of shades exists, the details of these being beyond the scope of this publication.

Are You **THINKING** of **SELLING**?

This is

**HOW THE STAMP TRADE WORKS**Philatelic Expert Lets You into his *Selling Secrets* so you can benefit from a **totally different (and New) Selling Experience**

by Andrew McGavin

**1 If You want to learn** how the stamp trade works, please read on... When I was 15, I did. I wondered if there was some secret source of supply? So, I bought my 1st stamp mixture, (wholesale I thought), broke

it into 50 smaller units, advertised it in Stamp Magazine 'Classifieds', and waited for the orders to roll in... I'm still waiting, 48 years later!...

**Wrong Offer X Wrong Price X**  
**Wrong Place X**

(naïve seller ✓ = ☹ me but I was only 15 at the time!)

**2 Three years later**, attending my first public stamp auctions I wondered how some bidders seemed to buy everything, paying the highest price? It didn't occur to me that they were probably Auction Bidding Agents, paid by absent (dealer) bidders to represent them. I wondered why two collectors sitting side by side muttered to each other "he's a dealer" as if that justified him paying the highest price...

...but did it really? What was the real reason? How could a Dealer pay a higher price than a Collector? It doesn't make sense, does it? Collectors are customers. Customers usually pay the highest price, unless... for a Collector, this was...

**Wrong Presentation X Wrong Place X**  
**therefore Wrong Price X**

**3 Fast-forward 48 years later** to a British Empire collection, lot #1 in an International Stamp Auction - Estimated at \$3,000, but we were the highest bidder at \$21,000 - **YES** - some 7x higher. Including Buyer's Premium in the extraordinary sum of \$4,788 we actually paid GBP\$25,788= upon a \$3,000 estimate... **however**, we broke it down into sets, singles, mini-collections etc. We made a profit. Some

might say it found its price. Others may say:

**Wrong Estimate X Wrong Presentation X**  
**Wrong Structure X Wrong Protection of Price X**

- **Lucky for the seller that 2 well-healed bidders saw the potential value that day** or it could have been given away... the seller

could easily have lost out couldn't he? or she?

**So, by un-peeling the layers of obfuscation, hopefully we can all agree:**

**The Secret is Simple -**

**it's ALL About: TIMING,**

**Plus the 3 Philatelic 'P's -**

**Presentation ✓ Place ✓ and Price ✓**

**4 Understanding the problem...** I always remember the car trade had their own little 'bible' - Glass's Guide. I've no idea, I've not even looked - in this internet-dominated world, it may even have disappeared. Well, there's an insider Stamp Trade publication for Stamp Dealers called 'The Philatelic Exporter'. There's nothing that special about it - and you won't learn much or find massively reduced prices by subscribing - **BUT** - it is a forum, a paper focal point, a last 'bastion' in this on-line transparent world that we inhabit... whereby dealers (and auctioneers) can try and communicate with each other. I publish my own articles there...

Recently I discussed the outcome of my 10 years' simple research, asking dealers and auctioneers 'what is your biggest problem?'

To a man, (why are we almost all men), they replied - "my **biggest problem is stock, if I can get more of the right stock I can sell it easily**"

Strange that, nobody ever asked me the same question back - because my answer would have been entirely different (and I don't treat it as a problem) - **I seek to satisfy collectors**

This is the reason why my company has such massive advertising. This is the reason why we spend up to 8% of turnover - up to \$200,000 per annum in marketing costs. (Most dealers don't even sell \$200K per annum).

**About The Author** Andrew found his Father's stamps at the age of 10. A year later at Senior School he immediately joined the School Stamp Club. He 'specialised' (!) in British, but soon was interested in Queen Victoria which he could not afford. The 2nd to last boy wearing short trousers in his school year, he religiously bought Post Office New Issues on Tuesdays with his pocket money. He soon found that he enjoyed swapping / trading stamps as much as collecting them. Aged 19, eschewing University he quickly found a philatelic career in London, leading to creating his own companies in stamps. Andrew has authored many internationally published Stamp 'Tips' articles, appearing on Local Radio and National TV promoting Philately with Alan Titchmarsh. Andrew's area of expertise is unusual - in so far as his grounding in collecting and wide philatelic knowledge has given him a deep understanding of Philately. He has studied Philately for the past 45 years, in combination with Commerce and Marketing Expertise, enabling him to create synergies in 'lifetime' interlinked Stamp Selling Systems, selling unit-priced stamps through to handling collections & Rarities up to £700,000 each. Today Andrew is fortunate to be co-owner with his Wife, of Universal Philatelic Auctions (aka UPAA) - the Largest No Buyer's Premium Reducing-Estimate System Stamp Auction in the World, creating records selling stamps to 2,261 different bidders from 54 different countries in his latest auction. Andrew stopped collecting stamps aged 18 reasoning that his enjoyment of stamps would be in handling them and selling them...

## PRE-DECIMAL MACHIN DEFINITIVES

In this section, prices are given for unmounted mint (left) and fine used (right). Exceptions are made where used prices are not applicable, for example booklet panes and gum varieties.

The Machin head of Queen Elizabeth II is so-called because it is based on a photograph of a sculpture by Arnold Machin. All designs in the series are similar, but small differences can be found in the head itself and in its setting in the design.

There are also varieties in the number and positioning of phosphor bands.

## DECIMAL MACHIN DEFINITIVES

In this section, prices are given for unmounted mint (left) and fine used (right). Exceptions are made where used prices are not applicable, for example in the case of booklet panes and gum varieties.

All stamps have fluorescent-coated paper unless otherwise stated.

### Gum

Gummed stamps can be found with three different gums.

Gum Arabic is either colourless or yellow in appearance and is very shiny. Polyvinyl alcohol gum (PVA) is colourless but has a matt appearance. Polyvinyl alcohol with dextrin gum (PVAD) is also matt, but has a blueish or greenish tinge.

Self-adhesive definitives have become increasingly common since 1993.

### Phosphor

Phosphor at first was applied in the form of vertical bands. When you hold a stamp up to the light and look along the surface, the paper itself appears shiny while the bands have a dull appearance.

Most stamps have two phosphor bands, on the two vertical edges; others have just one, which can be central or down the left or right vertical edge.

The width of the bands can vary, as can the size of the printing screen used to apply them, but these differences are beyond the scope of this publication.

Booklet panes, where stamps of the 2nd class rate (requiring a single phosphor band) have been printed se-tenant with other stamps (requiring two phosphor bands), have been found with the phosphor printed as bars rather than bands. Whereas bands extend across the perforations to the next stamp, these bars stop at the edge of the stamp design.

The term 'all over phosphor' is used where the phosphor was printed over the entire surface of the stamp, rather than in the form of bands. In some cases it was printed onto the paper before the stamp design was printed; in other cases it was printed afterwards.

The term 'no phosphor' is often applied to stamps with the phosphor omitted in error; such errors are outside the scope of this publication. However, the 50p and 75p values have been printed without phosphor in the normal course of events.

### Paper

At first, from February 1971, these stamps were printed on what is now called 'original coated paper' (OCP), which gives a dull violet reaction when the front of the stamp is viewed under ultra-violet light.

This was gradually replaced from August 1971 by 'fluorescent coated paper' (FCP) which gives a bright reaction under ultra-violet light, and then from August 1979 by 'phosphor-coated paper' (PCP), which adds the after-glow of phosphor and makes the stamp appear uniformly shiny.

Note that stamps with phosphor omitted in error also have a uniformly shiny surface, so those with phosphor-coated paper can only be positively identified by their reaction under

ultra-violet light.

The appearance of stamps with phosphor-coated paper can vary considerably due to variations in their drying time after printing. The abbreviation 'PCPI' is used to denote a dull appearance, and 'PCPII' a highly glazed appearance.

Some stamps with phosphor-coated paper have been found with the fluorescent brightener omitted. These still give a phosphor afterglow, but the paper gives a dull violet reaction similar to that found with original coated paper.

Attempts to standardise the paper produced what is known as 'advanced coated paper' (ACP), in use from March 1983. The visual difference between ACP and PCPI is minimal, but the former gives a brighter reaction under ultra-violet light.

### Value and portrait

Minor changes can be noted in the position of the denomination of value in relation to the Queen's portrait, and the position of the portrait in relation to the base of the stamp.

### Booklet panes

At first booklets were held together by stitching, so that a number of small holes can be found in the binding margin on the left hand side of panes. Later, the panes were stuck into booklet covers by the binding margins; in many such cases, panes can be found with the binding margin to the left or to the right.

In the case of stitched booklets, the booklet panes are recorded separately. Where the panes are stuck into the covers, most collectors prefer these as complete booklets, so the separate panes are not recorded.

Many of the early decimal booklet panes included non-postal labels se-tenant with the stamps in the pane, adjacent to the binding margin. At first these panes were perforated between the labels and the margin, but later they were not.

In 1987, as an experiment to counter complaints about the poor guillotining of panes, some booklet panes were produced with stamps with either the left or right-hand edge imperforate.

### Coils

There are two different types of coils or rolls from which stamps may be found.

Where the source of a stamp is listed as 'coils', this refers to coils of the same value, usually 1st class or 2nd class, joined either horizontally or vertically. These were usually produced for use by businesses.

Where the source is listed as 'se-tenant coils', this refers to coils containing a mixture of values joined as a strip. These were usually produced for sale through vending machines.

### Cartons

In an experiment staged in Scotland in 1976-78, 1st class and 2nd class definitives (including country definitives) were sold in cartons from vending machines. Sold at 30p or 60p, they contained either 6½p and 8½p, or 7p and 9p stamps.

## DEFINITIVES WITH ADDITIONAL SECURITY FEATURES, 2009 to date

Stamps feature U-shaped security slits, and/or an iridescent wavy-line overlay text inscribed 'Royal Mail', with variant letters which indicate the source of the stamp (if not from counter sheets), and the year of production (from 2010).

Source codes are 'FOYAL' or 'MFIL' (booklets of four), 'MSIL' (booklets of six), 'MTIL' (booklets of 12), 'MCIL' (booklets which include special issues), 'ROYBL' or 'MBIL' (business sheets), 'MRIL' (rolls), 'MPIL' (prestige stamp books) and 'MMIL' (miniature sheets).

Year codes are 'MA10' (2010), 'MA11' or 'M11L' (2011), 'MA12' or 'M12L' (2012), 'MA13' or 'M13L' (2013), 'MA14' or 'M14L' (2014), 'M15L' (2015), 'M16L' (2016), 'M17L' (2017) and 'M18L' (2018).

From 2016, mint stamps also feature security backing paper (SBP) with underlay text. This text can be found all upright, or upright and inverted in alternating double lines.

### ■ 2009 to date. Non-value indicators

Printed in gravure by De La Rue (sheets up to 2017) or Walsall (sheets from 2018, booklets and business sheets), or litho by Cartor (prestige stamp books). Self-adhesive, with slits and overlay text, except where stated.

## FOLDED BOOKLETS

In this section, items are priced in mint condition only.

### MACHINE-VENDED BOOKLETS OF MACHIN DEFINITIVES, 1976-2000

These booklets were sold from vending machines. They contain panes attached to covers by their top selvage, so the Queen's portrait is face-down. In most cases, panes are folded along their perforations.

**5 Why is that?** Because, as the world revolved the Stamp Market, imperceptibly **Changed**, and incrementally – **Massively**

So, although few will tell you this, it's clearly evident that the problem for most Sellers of Stamps today is no longer absent stock – but absent collectors in the place they choose to sell their stamps in. Simply put, other Dealers, Auctions, Stamp Fairs have not invested in marketing to have a strong Customer-core. To be fair, this is not true of all – but it is true of most – so that our nearest competitor 'Apex' had 800 bidders in a recent auction. In my most recent 20,000+ lot UPA 68th Auction we had 2,184 different bidders from 58 different countries, 95% of whom were Collectors. Some other well-advertised auctions only have 200 bidders (a high percentage of whom are dealers – so that, essentially they are Dealer-dominated auctions) – so that when you sell through them – you're paying up to 18% (including VAT) seller's commission and the buyer is paying up to 25% and more in Buyer's Premium, credit card fees, on-line bidding fee, delivery and insurance etc... **AND all of that so that your stamps may be sold, wait for it – TO DEALERS (and some collectors),** but Dealers, that naturally must make a profit to survive...

**6 Now, let's examine the cost implications – Example:** Your stamp collection sells in public auction for \$800. Upon a 25% buyer's premium, the dealer pays \$1,000 and it could be more. He breaks it into \$2,000+ selling price (much lower and he'll go out of business). The auction charges you a seller's commission of up to 18% (VAT included) upon the \$800 sale price. This is GBP£144. Therefore you receive approaching \$656 – which is approximately 33% of the dealer's \$2,000+/- retail selling price – BUT... now that we have identified the problem...

**Isn't the Solution Staring us Right In The Face ?**

**7 Why Pay an Auction to Sell to Dealers: Sell to Collectors instead ?** In our example with buyer's premium, sellers commission, lotting fees, extra credit card charges, VAT and even insurance – you're already being charged in different ways up to 40% of the selling price to sell, possibly or probably, **to the wrong person.**

**Why not direct that 40% cost you're paying to sell to Collectors instead?** Sounds good, so why hasn't this been done before ?

**8 Truth is, it Has been done before...** Sometimes the 'old' ways are the best ways aren't they? But in today's enthusiasm to obscure the obvious so that money may be taken, almost surreptitiously, in numerous different ways, (without us apparently noticing until we see the cheque in our pocket) – the transparent 'seller pays' has been deliberately 'obscured' – so much so that, **amazingly**, the latest 2017 European Auction Selling Legislation just introduced – now requires auctions that charge 'buyer's premiums' **to warn the buyer in advance.**

Just imagine going into the petrol station, and being warned that the price you're paying to put fuel in your tank is not the real price, you have to pay a premium! Obviously, there would be an uproar...

**9 How can you cut out the middleman and sell to Collectors instead?** Well, I can think of two ways. 1). **DIY** – Do It Yourself selling on eBay. That may be fine for lower grade material – but, would you risk auctioning relatively unprotected rare material on eBay ? We don't and we're professionals, so we should know what we're doing. Or 2). Cut out the extra middle-man. **Use my company UPA, which reaches collectors instead.** Here's how it works: Continuing from our previous **Example:**

The auction sold your stamps to a dealer for \$1,000 – but You received circa \$656

UPA sell them to collectors for you for up to \$2,000 – even after 40% commission you receive up to \$1,200. Up to \$544 more. Now that's amazing, isn't it? 🍷

**10 Sounds Good Andrew, but Can You 'Deliver'?**

Obviously, nothing is as simple as that, and as we auction stamps to collectors some collections may 'break' to the example \$2,000+/- but the stamps may be sold for more or less – especially as we reserve all lots at 20% below, (Estimate \$2,000 = \$1,600 reserve) and not everything sells first or even 2nd time so prices may come down... Naturally, it's not that straightforward for a dealer either – he may sell at a discount to 'move' stock **OR**, like many dealers he may be sitting on the same unsold stamps, that you see time and time again, in dealer's stocks years later and still at the same unattractive prices...

So, I think it is more reasonable for you to expect up to 36% to 50% more, indirectly or directly via my **Collector's Secret Weapon:** Universal Philatelic Auctions, which moves material more quickly, by incrementally reducing estimate (and reserve) price in a structured selling system...

**11 Q.) What is the Collector's 'Secret Weapon'?**

**A.) It's called the Unique UPA Reducing Estimate System... ★★**

This is a rather long explanation, I don't want to bore you, but 18 years ago, when my wife and I set up Universal Philatelic Auctions I detected that the stamp trade's biggest problem then was not what sold – **but what didn't sell...** So, because I didn't want to try to keep on offering the same either unsaleable or overpriced stock I created the unique UPA Reducing Estimate (and reserve) Selling System. Simply put, if a lot doesn't sell in the 1st auction we reduce the estimate (and reserve) by 11% and unlike other dealers and auctions **WE TELL YOU – 'US'** = once unsold. If unsold after the following auction we **reduce by a further 12% and WE TELL YOU 'US2'**, if unsold after a 3rd UPA auction we reduce by a further 13% and **WE TELL YOU 'US3'** and so on till the lot finds its price, is sold or virtually given away... ✓

**12 Any Scientist will tell you** that combinations of ingredients can produce powerful results. So we created the unique combination of my UPA Reducing Estimate System, married (in stone), with UPA's fair 'NO BUYER'S Premium' policy, **PLUS** each lot carries my total 'no quibble' guarantee – this formula is the reason why within the span of 4 auctions (one year)... 90%-95% of lots broken from a collection have sold. This Unique Philatelic Selling System **Formula** is the reason why we are the largest stamp auction in the UK today with 2,184 different bidders in my recent auction. 🧐

In Hindsight Dealers warned me 18 years ago that my idea wouldn't work. 18 years later I think I've proven that it does. (Reader: Please Request a complimentary UPA catalogue – using the contact details further below)

**13 OK, Cut to the Chase Andrew, what's the offer?** All of my Selling Systems are based upon **selling to Collectors Globally**, so that 95% of stamps sold by UPA are

## BUSINESS SHEETS

Sheets of self-adhesive stamps comprising either 100 stamps (1st class, 2nd class) or 50 stamps (1st Large, 2nd Large), supplied folded in concertina style. In early sheets the matrix was not removed; in later sheets it has been removed.

The date of printing has appeared within the stamps' security overlay since 2010, but separate dates are not listed here.

In this section, prices are given for what is typically collected: the top section of the sheet only, giving details of the contents and bearing four (1st, 2nd) or 5 (1st Large, 2nd Large) stamps, unmounted mint.

## POSTAGE DUES

From 1914 until they were withdrawn from service in 2000, postage dues were affixed to covers by the postal service to denote postage unpaid or underpaid.

Up to 1936, prices are quoted in three columns: unmounted mint (left), mounted mint (centre) and used (right). After 1936, they are quoted for mint (left) and fine used (right).

## POST & GO STAMPS

In most of this section, prices are quoted in two columns: mint on backing paper (left) and fine used (right). Where there is only one column, this is for mint stamps on backing paper, except in the case of first day covers.

This listing is limited to labels dispensed from self-service machines, with the value printed at point of sale and no restrictions on date of use.

### Post office machines

Since October 2008, automated kiosks have been installed at an increasing number of post offices, vending self-adhesive stamps to order.

Besides a 'Post It Now' service with labels meeting a wide range of postage rates (which are outside the scope of this publication), they offer a 'Buy A Stamp' service in which a pre-printed base design is overprinted at the time of the transaction with details of one of a limited selection of postage rates, along with a code which identifies the post office and machine number.

The machines installed in post offices from 2008 were manufactured by Wincor Nixdorf, and could print the stamps in strips of up to five. Between February 2014 and March 2015, these were gradually replaced by machines manufactured by NCR, which can print in strips of up to six.

### Royal Mail machines

Since 2011, Royal Mail has also had its own range of machines, initially referred to as Hytech but upgraded to Series B in 2014. Overprints from these have a slightly different typeface from the machines installed in post offices.

Royal Mail machines have been used to print the strips and packs which are available from the philatelic service. They have also been temporarily installed at various philatelic events in Britain and abroad, in 'pop up' post shops, and permanently installed at a growing range of museums, in many cases dispensing stamps with an additional commemorative or location-identifying inscription. They have also been available at Royal Mail enquiry offices, initially with location-identifiers in 2014–15 although this practice was then discontinued.

Some machines, such as those at the Royal Mail Engineering Department at Wheatstone House, Swindon, and at RAF Hortholt, are accessible only to people working on the premises.

As the use of Post & Go has extended to other stamp-issuing countries, machines installed at Broad Street in Jersey, Envoy House in Guernsey and Gibraltar House in London have also dispensed stamps with UK postage rates and location-identifying overprints.

When machines are installed at exhibitions beyond Europe, strips with the same event inscription are also made available from Tallents House in Edinburgh.

### Postage rates

From 2008, the five rates available were 1st class, 1st Large, Europe up to 20g, Worldwide up to 10g and Worldwide up to 20g. Towards the end of 2011, Worldwide up to 40g was added to offer a sixth option.

From 2011, vending machines have offered a 'collector's strip' comprising one of each of the six standard rates (although in

the case of Wincor Nixdorf machines these were vended as two strips of three).

A 2nd class rate was introduced in 2013, although it was not made widely available until 2014 and is not included in standard collector's strips.

With tariff changes in 2014, the Worldwide up to 10g and Worldwide up to 20g rates were replaced by Europe up to 60g and Worldwide up to 60g, and after a short delay the Europe up to 20g rate was changed to Europe up to 20g/Worldwide up to 10g (expressed on the stamps as 'Euro 20g/World 10g'). In 2015, both 60g rates were uprated to 100g.

Although pictorial sets are regularly superseded by new designs, none has formally been withdrawn from use, with the result that new rates have been reported machine-printed on old designs. Examples have also been found of the 2nd class design printed with 1st class rates, and vice versa.

### Printing

It is possible to distinguish the type of machine used to print a stamp from its typeface. In most cases the differences are slight, but two exceptions are '60g' and 'Euro 20g/World 10g', where there are clear differences between different machines.

Starting in September 2015, some rolls of stamps required in limited quantities were printed digitally. These have a shinier appearance than gravure printings.

Stamps printed in corrupted typefaces, with misplaced inscriptions and with incorrect values also exist, especially from the 2010–12 period, but they are outside the scope of this publication.

### Phosphor

All the stamps have two phosphor bands, except the 2nd class Machin, which has one phosphor band.

## COMMEMORATIVE SHEETS

In this section, prices are quoted for complete mint sheets only.

Commemorative sheets are an evolution of Smilers sheets. They are not personalisable but are customised as a souvenir product by Royal Mail.

Early issues had normal gum, but most subsequent issues have been self-adhesive.

## PRESENTATION PACKS

In this section, prices are quoted for packs in mint condition only.

Presentation packs have been issued regularly for special stamp issues since 1964, and definitives since 1967, but many collectors regard the packs sold in 1960 (which were also marketed in the USA and therefore also found priced in US dollars) as the forerunners of these collectables.

Packs issued by Royal Mail in foreign language and other special versions are listed in this section, but those produced privately, commercially sponsored or not placed on general sale are outside the scope of this publication.

sold directly to Collectors. If you wish to benefit by up to 50% or more, depending upon your circumstance and type of material, by cutting out the middleman – then this offer may be for you. Generally 'time' is the enemy in our lives, and for most dealers not being able to sell stock. Now is the time to let 'time' do the 'heavy-lifting' and consider making 'time' work for you, so that at UPA you can make time your friend. 

## 14 AND the SMALL PRINT?

Some lots are too small in value for us to offer this system. Other lots may not be suited to selling in this manner (e.g. surplus mint British decimal stamps best used for postage) – especially if the market is heavily compromised by stock overhang in specific areas. Some Collectors will not wish to use time and systems to leverage price, others will want to agree a specific price and know that they are paid precisely this amount. No client is treated like a number and no client is forced like a square peg into a round hole. 

## 15 OK, What Do I Do Next?

a). You contact UPA to discuss with Andrew or a highly-qualified Auction Valuer/Describer what you have to dispose of and your options bearing in mind your specific interests / requirements

b). If you wish, get a 2nd opinion, but investigate what type of auction / dealer you are dealing with. Is it a Dealer's auction with relatively few collectors? Can you see where / how the Dealer sells? If you can't easily see any pricelists or high quality selling catalogues – that Dealer may sell your stamps to other dealers...

c). Finally you ask U P A to collect your stamps, insure in transit for an estimated replacement retail value...   

## 16 What Happens then?

A member of my Team telephones/e-mails you to confirm safe receipt. 'Overnight' valuations, unless simple, are rare. Valuing stamp collections that have taken tens of years to create takes time. Depending upon your priorities / timescale I, or an experienced member of my Team will contact you to discuss your requirements and the options available to you for the sale

### UNSOLICITED TESTIMONIAL:

Dear Folk at UPA,  
I've dealt with the public for 37 + years, and as both a consumer, and a businessman, I have created huge numbers of orders from all over the world from a complete range of suppliers from all aspects of our daily lives.

But I don't believe I have ever encountered such sensitivity, such kind thought, such understanding as I have with you in our initial meeting, our subsequent successful transaction, and now this.

I recall well the item you highlight, and realise that this one item has such colossal personal value, I could never part with it.

It has been an absolute pleasure dealing with yourself, and I am more than willing for you to use this e-mail as commendation to others who may be thinking of disposing of their collection.

Many, many thanks for a memorable experience, and I will try to emulate your thought and care in my own business sphere.

Yours sincerely  
D. E. B. Bath, UK

of your collection. Provided only that you feel well-informed and comfortable do we agree strategy 

## 17 How Strong is the Stamp and Cover Market?

Everybody knows that the strongest areas are GB and British Empire. Post-Independence / QEII material sells but if hinged at considerable discount. Mint hinged material pre 1952 is regarded as the

industry 'norm' and therefore desirable – but genuine never-hinged commands a premium. Europe sells but at reduced levels, Americas is good, as generally is Asia but the 'heat' has come off China which is still good – and Russia which can still be good. East Europe is weaker. Overall, Rarities throughout can command their own price levels and real Postal History has good demand.

## 18 What Should I Do Next?

Discuss your collection with U P A. Contact Andrew or an experienced member of his Team now...  

## 19 Guarantee: I want You to be absolutely Sure

So If You're not sure we'll transport and return your stamps for FREE up to \$200 in actual shipping cost at our expense. It sounds generous (and it is), but it's far less than the cost of driving 100+ miles each way and 3 to 6 hours in your home valuing your stamps 

## 20 My Double Cast Iron Guarantee:

We can do a better job valuing your stamps in our office than in your home. If you don't agree I'll pay you an extra \$50 for you to pay somebody trusted to open the boxes and put your albums back, in the same place, on the shelf they came from.  

## 21 Act NOW: Contact Andrew

or an experienced member of his Team using the on-line selling form at our website, by fax, telephone or by mail. We'll work harder for you not to regret the decision to sell all or part of your collection...

# Selling your stamp collection?

Warwick and Warwick have an expanding requirement for world collections, single country collections, single items, covers, proof material and specialised collections. Our customer base is increasing dramatically and we need an ever-larger supply of quality material to keep pace with demand. The market is currently very strong for G.B. and British Commonwealth and the Far East. If you are considering the sale of your collection, now is the time to act.

## FREE VALUATIONS

We will provide a free, professional valuation of your collection, without obligation on your part to proceed. Either we will make you a fair, binding private treaty offer, or we will recommend inclusion of your property in our next public auction.

## FREE TRANSPORTATION

We can arrange insured transportation of your collection to our Warwick offices completely free of charge. If you decline our offer, we ask you to cover the return carriage costs only.

## FREE VISITS

Visits by our valuers are possible anywhere in the country or abroad, usually within 48 hours, in order to value larger and valuable collections. Please phone for details.

## ADVISORY DAYS

We have an ongoing programme of advisory days, in all regions of the United Kingdom, where you can meet us and discuss the sale of your collection. Visit our website for further details.

## EXCELLENT PRICES

Because of the strength of our customer base we are in a position to offer prices that we feel sure will exceed your expectations.

## ACT NOW

Telephone or email Ian Hunter today with details of your property.

Why can my UPA stamp auctions offer what others can't, or don't want to? There's two answers – nobody else is prepared to put so much effort into getting it right for Collectors – that's the reason why 95% of UPA bidders are Collectors, not dealers...

... and secondly – you can only offer so much if you have 'SCALE'. Thanks to 2,002 different bidders we have scale – and this is the reason why I would like you to apply for my next auction catalogue below, in any way, today – it's also the reason why I'm offering you your 1<sup>st</sup> GBP£55 Auction Winnings FREE Offer (US\$72) provided you win £75+ (US\$98+) auction winnings so you can test UPA like more than 2,500 other collectors have – by taking my 1<sup>st</sup> £55 FREE OFFER (US\$72) –

## YOUR ESSENTIAL GUIDE TO MORE THAN 175 YEARS OF BRITISH STAMPS

■ Published by the same team of philatelists who bring you *Stamp Magazine*, this easy-to-follow guide is the essential publication for all Great Britain collectors, from the beginner to the very experienced.

■ Its comprehensive listing includes all GB stamps and other philatelic material issued from 1840 to mid-2019.

■ Unaffiliated to any dealer, this is the only annual guide that will give you a realistic market value for your stamps, rather than an inflated catalogue price.

■ Don't buy or sell any British stamp before you study this book. It can both save you money and make you money, so you just can't afford to be without it!
